About

Thiguka is a constructed language that Lemuria has continued to develop since April 2024. This contains a full description of Thiguka's grammar, ready for your reading pleasure.

Glossing abbreviations

AGR~ADJ is used for adjective agreement.

- (1) tu~gu-elo tubi
 AGR~ADJ-yellow water
 'urine'

PROX is used for the proximal determiner.

MED is used for the medial determiner.

DIS is used for the distal determiner.

Acknowledgements

Thank you for reading the Thiguka documentation.

There are some people who have (constructively) criticized Thiguka; the criticism I want and need to make Thiguka a better and more well-documented language.

So far the only person to offer any extensive criticism is Zethar of the Conlangs Discord Network; in June 2024, I took part in a translation relay that Zethar hosted. At the end of the contest I received about a page's worth of criticism, which I used to further improve Thiguka's documentation.

Part I

Language

Chapter 1

Phonology

Perhaps one of the rarest characteristics of Thiguka phonology is its complete lack of phonemic nasals. Thiguka has 11 consonants, 6 vowels, and 6 diphthongs.

	Bilabial	Labiodental	Dental	Alveolar	Velar
Plosive	p, b			t, d	k, g
Fricative		f	θ	s	
Rhotic				r	
Lateral				l	

Table 1.1: Consonant Phonemes

	Front	Back
Close	i	u
Close-Mid	e	o
Open	a	ɑ

Table 1.2: Vowel Phonemes

Diphthongs	ai	ei	ui	au	ɑi	ia
------------	----	----	----	----	----	----

Table 1.3: Diphthongs

The [r] consonant is realized by Lemuria as the English approximant, however one may also pronounce it as a flap or trill if desired.

Thiguka inserts a glottal stop [ʔ] between vowels.

[ia] is very rare in a priori Thiguka words, being exclusively used for loanwords such as Enya (Elija).

1.1 Nasals

Thiguka completely lacks nasals. [n] is an allophone of [l], while [m] is an allophone of [b], and [ŋ] is approximated as any one of [lg g k l ɬ]. The chosen consonant differs depending on the context the velar nasal is in; for example, a speaker would not want to use [g] in for ‘fang’ [faŋ], because then they would be uttering a racial slur.

Table 1.4: Examples of nasal consonant approximations in Thiguka

English	English IPA	Thiguka	Thiguka IPA
Lemuria	[li.ˈmɜɹ.iə]	Liburija	[ˈli.bur.ia]
Enya	[ˈɛn.jə]	Elija	[ˈelia]
Lena Raine	[ˈlɛnə ˈreɪn]	Lela Reyl	[ˈlela reɪl]

1.2 Stress

Thiguka places stress on the first syllable of the root word. However, stress is not a phonemic feature in Thiguka, and English speakers speaking Thiguka with English stress rules will be readily understood.

1.3 Phonotactics

Thiguka syllable structure is (C)(C)V(C).

Words may not end in [k, r, l]. If due to loanwords, or conjugations the word ends up ending in these three forbidden consonants, either add a dummy -a suffix, or remove the offending consonant.

Words may not end in consonant clusters.

Two diphthongs separated by a single consonant are not allowed — *aybay.

Vowels next to each other, that are not diphthongs, are pronounced with a glottal stop inserted between them.

Chapter 2

Grammar

Thiguka has an agglutinative grammar, a nominative-accusative case marking system, subject-verb-object word order, a tense-aspect system, a single copula with 37 irregular forms that inflect for time, person, and number, and a 38th irregular form that acts as a general-purpose copula.

2.1 Plurality

Plurality marking is optional. If the speaker does not know the quantity of a noun, they may simply omit it.

Table 2.1: Plurality

Plurality	Suffix
None (zero)	-pa
Singular	-sa
Dual	-gula
Plural	-elah

2.2 Case

Thiguka features six cases, with their own specific uses. Case marking is completely optional. A completely uninflected word is that word's dictionary form.

Table 2.2: Cases

Case	Suffix
Nominative	-pah
Accusative	-tay
Dative	-lay
Genitive	-pafay
Locative	-kala
Instrumental	-kithi

2.2.1 Nominative

Nominative case is used in Thiguka to mark subjects.

- (2) Thaka-**pah** falusaya rifari-tay-elah
1SG-NOM like music-ACC-PL
“I like music.”

2.2.2 Accusative

Accusative case is used in Thiguka to mark objects.

- (3) Thaka-pah falusaya rifari-**tay**-elah
 1SG-NOM like music-**ACC**-PL
 “I like music.”

2.2.3 Dative

Dative case is used in Thiguka for the beneficiary of an action.

- (4) Thaka-pah pa-kalath-a Thiguka-tay kake-**lay**
 1SG-NOM PFV-teach-FUT Thiguka-**ACC** 2SG-**DAT**
 “I will teach you Thiguka.”

Both *kalaththa* and *kalatha* are valid future tense forms of *kalath* (“to teach”).

2.2.4 Genitive

Genitive case has only been used by Lemuria in his Thiguka writings, to indicate posession.

- (5) Kasa-pah gulaya Gahlia-**pafay** gahlirithi.
 PROX.DET-NOM COP.3SG.PRS Gallia-**GEN** violin
 “This is Gallia’s violin.”

2.2.5 Locative

Locative case is used for a location or a time something happened. It can be combined with the preposition *ifil*.

- (6) Pothu-pah pa-teligara-ta ifil Los Algeles-**kala** ifil literidilay-**kala**
 3SG-NOM PFV-twitch.stream-PST in Los Angeles-**LOC** in yesterday-**LOC**
 “She streamed on Twitch in Los Angeles yesterday.” (lit. “She streamed on Twitch in Los Angeles, in yesterday”)

2.2.6 Instrumental

Instrumental case is used to denote, in general, the methods through which the subject did something.

- (7) Pothu-pah pa-sapakalakesi-ta ka~gu-rifari kalakesi Lipset-**kithi** ifil Los Algeles-kala,
 3SG-NOM PFV-graduate-PST AGR~ADJ-music school Lipsett-**INS** in Los Angeles-LOC
 Kaliforlija-kala.
 California-LOC.
 “She graduated from the music school under Lipsett in Los Angeles, California.”

In this example, perhaps Lipsett had been “her” primary music teacher the whole time she was at the school.

2.3 Adjectives

Adjectives in Thiguka are placed before words. To attach an adjective to a word, the first syllable of the modified word, followed by *-gu-* should be prefixed to the adjective.

There is no enforced adjective order in Thiguka. Speakers may position adjectives as necessary to highlight particularly important qualities.

- (8) ri~gu-gulid rifari
 AGR~ADJ-good music
 ‘good music’

Adjectives can be used as nouns too:

- (9) Pothu-pafay gu-gulid-pah kufa pelu-tay-elah falusaya-sa pothu-tay
 3SG-GEN ADJ-good-NOM allow person-ACC-PL admire-PRS 3SG-ACC
 ‘Their greatness made them likeable.’ (Their goodness made people like them.)

Speakers may also choose to include additional syllables if multiple words begin with the same syllable.

- (10) Fulafata-sa, pafay-sa thi~gu-sapara thil-elah, alu ara~gu-li-saleyfata arafat-elah alu
 hike-PRS, have-PRS AGR~ADJ-type thing-PL, and AGR~ADJ-NEG-occupation art-PL and
 fulahthi lores **lisu**~gu-furos li-lahkela li~gu-pera **lisure**.
 fun.make.thing-PL COP.3PL.PRS AGR~ADJ-fun NEG-make AGR~ADJ-money fun.activity.
 ‘Hiking, having themed objects, and non-professional art are fun not-money-making hobbies.’

In this example, *furos* is modifying *lisure*, but to use **ligufuros* would have caused ambiguity due to the presence of *lilahkela* and *ligupera* in the sentence.

2.3.1 Modifying multiple words

To use a single adjective to modify multiple words, three approaches are possible.

The first method is to use the *gusi-* prefix, from the linking syllable *gu* and the relativizer *si*.

- (11) Si-gu-isa-safi, thaka-pah ithefali ithere-tay alu lahkela kolugeyle-tay-elah
 REL-ADJ-one-th.odd 1SG-NOM browse internet-ACC and make video.game-ACC-PL
 First, I browse the internet and make video games.

Either syllables of all the words modified can be included, or the adjective can be duplicated for each word that needs to be modified.

If including multiple syllables of the modified words, the order of the syllables must match the order in the sentence.

(Adapted from one of Zethar’s translations)

- (12) fu~gu-dalata thaka-pah kas-gasari alu filay-fulafata
 AGR~AGR~ADJ-two 1SG-NOM CONTEM-action and with.cat-hike
 Secondly, I practice and hike with the local cats.

In this sentence, **fukagudalata* would be incorrect as it is not presenting the adjectives in the order that they are being used in the sentence.

- (13) kagu-dalata thaka-pah kas-gasari alu fu~gu-dalata filay-fulafata
 AGR~ADJ-two 1SG-NOM CONTEM-act and AGR~ADJ-two with.cat-hike
 Secondly, I practice, and secondly, I hike with cats.

However, the approach of using the same adjective twice will cause a semantic change in meaning. It may simply be another thing that gets “lost in translation”.

It’s not clear what one needs to do for adjectives modifying more than one thing.

— Zethar, Ambagame³

2.4 Determiners

Thiguka has proximal, medial, and distal determiners. Determiners are placed before root words.

- (14) ka~gu-parthas kasa kaela
 AGR~ADJ-pink.purple PROX.DET tree
 ‘this sakura tree’
- (15) ka~gu-parthas saka kaela
 AGR~ADJ-pink.purple MED.DET tree
 ‘that sakura tree near you’
- (16) ka~gu-parthas asila kaela
 AGR~ADJ-pink.purple DIS.DET tree
 ‘that sakura tree’

2.5 Tense-aspect

Thiguka has a tense-aspect system.

Tense and aspect are optional. If tense and aspect are omitted, the verb becomes infinitive; or the time it took place becomes ambiguous, granting it time-independence.

- (17) katarila
 outer.space.travel
 ‘to travel through outer space’
- (18) ras-katarila-ta
 ACCIDENT-outer.space.travel-PRS
 ‘to have accidentally traveled through outer space’
- (19) ge-katarila-sa
 PROG-outer.space.travel-PRS
 ‘to be currently traveling through outer space’

2.6 Pronouns

Thiguka completely lacks gender distinction in pronouns, and has aclusivity distinction in first person pronouns.

Thiguka has no T-V distinction in pronouns. Politeness may be achieved by attaching positive adjectives to second-person pronouns, but this is discouraged and goes against Lemuria’s intentions.

Table 2.3: Tense

Tense	Suffix
Past	-ta
Recent past	-tu
Present	-sa
Future	-tha

Table 2.4: Aspect

Aspect	Prefix
Perfective	pa-
Perfect	fe-
Progressive	ge-
Imperfective	sa-
Contemplative	kas-
Accidental	ras-
Intentional	ka-

Table 2.5: Pronouns

person/number	First	Second	Third
singular	thaka	kake	pothu
plural		katake	rafu
inclusive plural	situ		
exclusive plural	pata		

2.7 Verbs

2.7.1 Morpheme order

For verbs, the order is as follows: Derivational prefixes, Negation or intensifiers, Aspect, Stem, Tense, Ad-verb suffixes

2.7.2 Transitivity

Thiguka's verbs will vary in transitivity. Early versions of Thiguka's Anki lexicon may not have sufficient transitivity tagging.

2.7.3 Stative verbs

Stative verbs can be expressed through a progressive verb.

A copula here like *gulaya* is optional.

- (20) Pothu-pah (gulaya) ge-parakala-sa gahlirithi-tay.
 3SG-NOM (COP.3SG.PRS) PROG-learn-PRS violin-ACC
 "She is learning the violin."

- (21) Pothu-pah ge-parakala-tha gahlirithi-tay.
 3SG-NOM PROG-learn-FUT violin-ACC
 "She will soon be learning the violin."

Once she's learned the violin, one can say:

- (22) Pothu-pah ge-kala-sa gahlirithi-tay.
 3SG-NOM PROG-know-PRS violin-ACC
 “She knows the violin.”
- (23) Pothu-pah ge-pafay-sa ka~gu-gahlirithi kala-tay.
 3SG-NOM PROG-know-PRS AGR~ADJviolin knowledge-ACC
 “She has knowledge of violins.”

2.7.4 Examples

Some examples of verbs will follow.

parakala (“to study; to learn; to receive knowledge”)

- (24) Pothu-pah ge-parakala-sa gahlirithi-tay Olifia-kithi.
 3SG-NOM PROG-learn-PRS violin-ACC Olivia-INS
 “She is learning the violin with Olivia.” (transitive, +instrumental)
- (25) Pothu-pah ge-parakala-sa gahlirithi-tay Beti-kithi ifil ka~gu-rifari kalakesi-kala ifil
 3SG-NOM PROG-learn-PRS violin-ACC Betty-INS in AGR~ADJ-music school-LOC in
 Sikago-kala.
 Chicago-LOC
 “She is learning the violin with Betty at a school in Chicago.” (transitive, +locative, +instrumental)
- (26) Pothu-pah ge-parakala-sa.
 3SG-NOM PROG-learn-PRS
 “She is learning.” (intransitive)

2.8 Adverbs

In Thiguka, adverbs are either placed before the verb they modify or as clitics to the end of the verb. These adverbs may be marked with the marker *-se*, but can be omitted if there is sufficient context.

- (27) Rafu-pah pa-leyle-ta=thasi rafu-pafay balisa-lay-sa Katrila-tay.
 3PL-NOM PFV-name-PST=also 3PL-GEN.POSS daughter-DAT-SG Katrina-ACC
 “They also named their daughter Katrina.”

However, *-se* is mandatory when adverbializing an adjective:

- (28) Usage of *free* as an adverb:
 Thaka-pah pa-paratas-ta= li-pera- se kasa kolusute-tay-sa
 1SG-NOM PFV-receive-PST=NEG-money.ADV-ADVZ this computer-ACC-SG
 I received this computer for free.

2.9 Template

Thiguka positions morphemes in a specific order, based on whether it is a noun or verb.

2.9.1 Noun

For nouns, the order is as follows: Derivational prefixes, Negation or intensifiers, Stem, Case, Adverb suffixes, Plurality.

2.9.2 Verb

For verbs, the order is as follows: Derivational prefixes, Negation or intensifiers, Aspect, Stem, Tense, Adverb suffixes

2.10 Derivation

Thiguka has multiple methods of taking in new words into its lexicon; such as compounding and the addition of derivational prefixes.

A few select examples of Thiguka derivational prefixes are:

1. fah-, agent prefix akin to English -er
2. ri-, intensifier
3. li-, negation
4. filay-, “in the presence of a cat”

(29) fah-katarila
AGT-space.travel
‘space traveler’

(30) fah-filay-katarila
AGT-with.cat-space.travel
‘one who travels through space with a pet cat’

(31) fah-filay-li-katarila
AGT-with.cat-NEG-space.travel
‘one who does not travel through space with a pet cat’

2.11 Copula

Thiguka has a single copula with 38 irregular forms.

Table 2.6: Copula forms

Person	Past	Recent Past	Present	Future
1SG	lasata	lasatu	lasa	lasatha
1DU	lagulata	lagulatu	lagulasa	lagulatha
1PL	lelahtaw	lelahtaw	lelahsa	lelahtha
2SG	kaketa	katu	kasa	katha
2DU	kagulata	kagulatu	kagulasa	kagulatha
2PL	kelahta	kelahtu	kelahsa	kelahtha
3SG	gulata	gulatu	gulaya	gulatha
3DU	poguta	pogutu	pogusa	pogutha
3PL	lotares	lotures	lores	lotheres

Chapter 3

Orthography

Thiguka’s orthography is phonetic, and is as follows.

Table 3.1: Thiguka orthography

IPA	Letter
p	p
t	t
k	k
b	b
d	d
g	g
f	f
s	s
r	r
l	l
θ	th
a	a
e	e
i	i
o	o
u	u
ɑ	ah
ai	ay
ei	ey
ui	uy
au	aw
ɑi	auy
ia	ija

Thiguka follows English punctuation conventions.

Loanwords are respelled to fit this orthography. The native spelling can be provided after the loanword in a parenthesis, for example:

Lela Reyl (Ilgis: Lena Raine) gulaya tagu-Arika tarifari.

3.0.1 Proper nouns and hyphens

Proper nouns are capitalized, but if they are being attached to a word — treated as an adjective, the prefix that comes before the adjective is usually separated from the adjective by a hyphen: *tagu-Ayris*, not **Taguayris* or **taguAyris*.

Writers also have the option of placing hyphens between proper nouns and affixes. *Reyl-pah* and *Reylpah* are both correct. However, this should usually not be done for proper nouns: **kaela-taygula* outside of glosses.

Chapter 4

Lexicon

Thiguka, as of May 2024, has about 350 defined words, with slight bias towards Internet and music-related terminology.

Thiguka's full lexicon is available at <https://github.com/thiguka/lexicon> in both tab-separated values format and an Anki deck. A select few words from Thiguka's lexicon are as follows:

4.1 Swadesh-Yakhontov list

Because of the author's laziness and some holes in the lexicon, he is only able to provide a 35-word Swadesh-Yakhontov list below:

- | | |
|--------------------------|-------------------------|
| 1. I — thaka | 19. tooth — tutho |
| 2. you (singular) — kake | 20. tongue — kageta |
| 3. this — kasa | 21. hand — aysi |
| 4. who — kalisu pelu | 22. know — kala |
| 5. what — kalisu | 23. die — dasay |
| 6. one — isa | 24. give — salath |
| 7. two — dalata | 25. sun — asalisa |
| 8. fish — gothi | 26. moon — luti |
| 9. dog — aso | 27. water — tubi |
| 10. louse — lafauy | 28. salt — salu |
| 11. blood — rahsa | 29. stone — sute |
| 12. bone — bole | 30. wind — lufah |
| 13. egg — logi | 31. fire — apay |
| 14. horn — kipi | 32. year — fasate |
| 15. tail — taysa | 33. current year — saro |
| 16. ear — eyla | 34. full — hakath |
| 17. eye — fathas | 35. new — bage |
| 18. nose — fothes | 36. name — leyle |

4.2 Unusual roots

Thiguka has some specific roots that many natlangs would need an entire sentence or even paragraph to describe. These roots are an extension of Lemuria's personality, condensing the things and concepts of significance to his life into one word.

1. ketala — fear of being banned by a moderator on the Internet while asleep
2. filay- — from English feline; prefix to indicate “with cat present”
3. katarila — space travel; because Lemuria asked someone (Catarina) in the Conlangs Discord Network too many questions about 3SG.GEN far-future world.
4. orielija — to sail away. Combination of Orinoco + Enya (whose name gets loaned as Elija due to Thiguka being a Lo Lasals Lalguaage.)

4.3 Interesting etymologies

Thiguka has some specific roots with interesting etymologies.

1. lirisara — to forget something completely obvious; – coined when in the Conlangs Discord Network, Lemuria asked what a “saralang” was in the Hiidaden thread of “projects”, failing to realize that the creator's name was Sarah.
2. gahlirithi — a violin; – short form of Gahljapafay lahrithi (“Gallia's music instrument”), from Gallia Kastner, a violinist who appeared in Lemuria's recommended one day.
3. ukagahli — to throw a sheep into a river; – because Lemuria observed Gallia throw a sheep into a river while playing a video game in June 2024. This itself is also an unusual root.

4.4 Twitch

Thiguka has its fair share of Twitch-related terminology. Lemuria knows a lot of indie musicians who sing for their viewers on the site and of course, can't help but have words just for Twitch.

1. Telits — Twitch
2. Telitslisa — n. fem. Female Twitch streamer
3. Telitstoli — n. masc. Male Twitch streamer
4. Telitspelu — n. epicene; Twitch streamer
5. teligara — v. to stream on Twitch
6. telufefi
 - n. a Twitch raid; when a streamer moves their viewers to another stream after ending
 - v. (transitive) to raid someone on Twitch
 - blend of Telits (“Twitch”) + “ofefi” (“to move”)
7. teliri — v. to fall asleep while watching a Twitch stream
8. telires — n. along a Twitch raid train (directionality)

Chapter 5

Syntax

5.1 Word order

Thiguka always uses a subject-verb-object word order. While hypothetically it may be possible to use alternate word orders due to Thiguka case marking, SVO is the intended order and alternative orders will cause possible confusion.

5.2 Questions

Two primary strategies for asking questions in Thiguka are to create declarative statements about the listener and allow the listener to fill in the blanks.

The intonation of these questions is rising; similar to English.

- (32) Kake-pafay leyle las
2SG-GEN name COP
'Your name is?'

Thiguka has one single determiner, 'kalisu' (what?).

A noun can be placed after 'kalisu' to further form the other English wh-words.

Table 5.1: Translations of English wh-words

Thiguka	English wh-word
kalisu	what
kalisu pelu	who
kathisa	why
kalisu pasla	where
kalisu tayle	when

'kathisa' is a shortened form of 'kalisu thilpahelah kufa kaketay'.

- (33) Kalisu thil-pah-elah kufa kake-tay?
What thing-NOM-PL coerce 2SG-ACC?
'What made you do it?'

An example of 'kalisu' is as follows:

- (34) Kalisu las kakepafay leyle?
what COP 2SG-GEN name
'What is your name?'

5.2.1 Polar

Polar questions are marked by the particle *kalu* added to the end of a sentence.

- (35) Kake las pe~gu-gulid pelu kalu?
 2SG-NOM COP AGR~ADJ person POLAR
 ‘Are you a good person?’

To further specify what is being doubted or asked about, *kalu* can be moved to the end of the word being asked about in question.

- (36) Kake las pe~gu-gulid kalu pe~gu-Arika pelu?
 2SG-NOM COP AGR~ADJ-good POLAR AGR~ADJ-America person
 ‘Are you a good American person?’ “(assumes the person is American, but doubts whether they are “good”)”

5.3 Possession

Possession is conveyed using the genitive case suffix *-pafay*.

- (37) Thaka-pafay kaela-gula
 1SG-GEN tree-DU
 ‘My two trees’

5.4 Negation

Negation is conveyed with the morpheme *li*, which can either be a prefix or a particle.

Negation cannot negate negation. Adding more negation only strengthens the negation instead of canceling it out.

- (38) Li! Thaka-pah li kisu-tha pothu-tay
 No! 1SG-NOM NEG kill-FUT 3SG-ACC
 ‘No! I will not kill them!’
- (39) Li-thaka-pah kisu-ta pothu-tay,
 NEG-1SG-NOM kill-PST 3SG-ACC
 ‘No, I didn’t kill them.’ lit. ‘Not-me killed them.’
- (40) Li-li-li-li-thaka-pah kisu-ta pothu-tay,
 NEG-NEG-NEG-NEG-1SG-NOM kill-PST 3SG-ACC
 ‘I definitely did not kill them.’

5.5 Relative clauses

Thiguka uses the relative marker ‘*si*’, which begins a clause used as the relative clause. It goes after the noun phrase that is being relativized.

- (41) Kasa pekulugusag-tay, si thaka-pah ri-kala, gulaya ri-gulid.
 PROX.DET moderator-ACC REL 1SG-NOM INT-know COP.3SG.PRS INT-good
 “This moderator, who I know, is good.”

- (42) Asila pekulugusag-pah-elah pa-ithesatha-ta kasa pelu-tay-sa si li
 DIST.DET moderator-NOM-PL PFV-ban-PST PROX.DET person-ACC-PL REL NEG
 ga~gu-ri-palad gasari
 AGR~ADJ-INT-bad action
 “Those moderators banned someone who did nothing wrong.”

5.6 Adverbial clauses

Thiguka also uses the relative marker ‘si’ for adverbial clauses. ‘si’ is prefixed to multiple words to further communicate the type of adverbial clause.

Temporal clauses:

- (43) Thaka-pah gulaya li-sifata ifil thaka-pafay laysa-pafay ta~gu-ri-gulid tayle
 1SG-NOM COP.3SG.PRS NEG-alive in 1SG-GEN mother-GEN AGR~ADJ-INT-good time
 “I was not alive during my mother’s golden age.”

Causal clauses:

- (44) Kare-pah, si-dasili li-kala kolusute, gulaya li-gu-asaga pafay situ-pafay
 Karen-NOM REL-reason NEG-know computer, COP.3SG.PRS NEG-ADJ-allow have 1PL.INCL-GEN
 lahpeled-pafay saleyfata
 company-GEN occupation
 “Karen, because she does not know computers, is not allowed to have a job at our company.”

5.7 Quantity

To communicate quantity in Thiguka, write a quantifier before the start of a noun phrase.

- (45) elah gahlirithi
 many violin
 “many violins”

In this gloss, both *gahlirithi* and *gahlirithielah* can be used. The *-elah* is already redundant due to the quantifier being placed in front of it.

In general, plurality suffixes are optional, even without a quantifier.

- (46) isa gahlirithi-elah
 one violin-PL
 “*one violins”

Of course, mismatching plurality suffixes are still wrong.

Quantifier words

Some Thiguka quantifiers for vague groups are as follows:

1. elah — many
2. lasat — all; every
3. rali — few
4. alsaf — half
5. tisara — one-third
6. keferi — simple majority (more than 50%)

5.8 Passive voice

Thiguka is a null-subject language in passive voice:

- (47) . kala-sa Liburiya-lay si-dasili pothu-pah pa-lahkela-ta Thiguka-tay.
 (people) know-PRS Lemuria-DAT REL-because 3SG-NOM PFV-make-PST Thiguka-ACC
 Lemuria is known because he made Thiguka. (lit. know Lemuria because he made Thiguka)

- (48) . kala-sa Gahlia-lay si-dasili pothu-pah gulaya fahgahlirithi.
 (people) know-PRS Gallia-DAT REL-because 3SG-NOM COP.3SG.PRS violinist
 lit. know Gallia because she is a violinist

The English approach to passive voice is acceptable too:

- (49) Liburiya-pah gulaya kala-ta si-dasili pothu-pah pa-lahkela-ta Thiguka-tay.
 Lemuria-NOM COP.3SG.PRS know-PST REL-because 3SG-NOM PFV-make-PST Thiguka-ACC
 Lemuria is known because he made Thiguka.

Part II

Examples

Chapter 6

Introduction

A variety of texts have been translated into Thiguka. The first major complete translation, from mid-April 2024, is Wikipedia's article on Lena Raine, an American music composer from Seattle who has made music for Minecraft.

The translation on Lena Raine is subject to errors, being an early text and not having been updated to reflect the latest changes to the Thiguka language as of May 2024.

7.4 English

Lena Rainé (/ˈleɪ.nə/ LAY-nə or /ˈle.nə/ LEN-ə; born February 29, 1984), also known as Lena Chappelle or Kuraine, is an American-Canadian composer, producer, and video game developer. Rainé is best known for her work on the soundtracks of *Celeste*, *Minecraft* and *Guild Wars 2*. She has composed music for various other video games, including *Deltarune* and *Chicory: A Colorful Tale*.

7.4.1 Early life

Rainé was born on February 29, 1984 in Seattle, Washington. Her father is a musician and her mother is a dancer. She had an early exposure to music due to participation in choir at a young age. Her father was also a violinist. Through a *Sonic the Hedgehog* fan community she was introduced to MIDI arrangement, first recreating versions of songs she knew and then making original music. She later attended Cornish College of the Arts for a degree in music composition.

7.4.2 Career

Rainé is best known for her work on the soundtracks of *Celeste* and *Guild Wars 2*. She worked on *Guild Wars 2* at ArenaNet for six years, as a designer and soundtrack composer. At ArenaNet, she and Maclaine Diemer were in-house composers of the music for the game's 2015 expansion, *Guild Wars 2: Heart of Thorns*. She left ArenaNet in 2016, but has continued to occasionally compose songs for its various releases as a freelancer.

In 2018, Rainé released the text adventure *ESC* on itch.io. Rainé was the developer and composer for *ESC*, with visuals created by Dataerose. In 2019, she released her debut album, *Oneknowing*. She composed music for *Minecraft*, creating four new pieces of music which were included in the 1.16 "Nether Update" in 2020. A year later, she returned to *Minecraft*, composing six new tracks for the 1.18 "Caves & Cliffs: Part II" update, alongside fellow video game composer Kumi Tanioka. A year after that, she also composed another three new tracks for the 1.19 "The Wild Update", and then about two years later, she composed five new tracks for 1.21 "Tricky Trials". Rainé created the soundtrack for the adventure RPG *Chicory: A Colorful Tale*, and assisted with the soundtrack for the second chapter of *Deltarune*, both released in 2021.

On May 28, 2024, Rainé announced *Anothereal*, a game combining elements of shoot 'em up and role-playing video games.

7.4.3 Personal life

Rainé is transgender. She has also written a book titled *City Of Tigers*, and has begun composing more LGBT-oriented fiction in her spare time.

7.4.4 Awards

Rainé was nominated for a BAFTA (British Academy of Film and Television Arts) and won American Society of Composers, Authors and Publishers (ASCAP) Video Game Score of the Year in 2019 for *Celeste*. Her soundtrack for *Celeste* was also nominated for Best Score/Music at The Game Awards 2018.

Chapter 8

Mid-sized translations

8.1 Fun activities

This was the sample passage for Conlang Ambassadors 3, a translation activity from May–June 2024.

English

There are many forms of fun activities in general. For example, there are hobbies which such as hiking, collecting themed objects, or non-professional creative arts and crafts. Some people like to play games or sports, or just like to enjoy looking at people's pictures, listen to other people's music, or watch other people perform. So long as someone enjoys the activity it is a reasonable recreational pastime.

Thiguka

Elah lisure saparapahelah esahlasa. Fulafatasa, pafaysa thigusapara thilelah, alu aragulisaleyfata arafat lores lisugufuros lilahkela ligupera lisure. 8.2 C418

To finish off all the Minecraft composers, here’s C418.

English original (Wikipedia)

Daniel Rosenfeld (born 9 May 1989), better known as C418 (pronounced "see four eighteen"),[4] is a German musician, producer and sound engineer. He is best known as the former composer and sound designer for the sandbox video game Minecraft. He is a co-founder of independent video game developer Ivy Road with Davey Wreden and Karla Zimonja, which is developing Wanderstop.

He has also written and produced the theme for Beyond Stranger Things and the Steam release of Cookie Clicker. He has also DJed for American rock band Anamanaguchi.

English literal

Daniel Rosenfeld (born May 9, 1989) also named C418, is a German musician in the video game Minecraft. He is known because he is the past composer and sound maker in the video game Minecraft. He, with Davey Wreden and Karla Zimonja’s help, made the video game development organization Ivy Road.

He has written also and made also music for Beyond Stranger Things, and Cookie Clicker’s Steam release. He has DJed also for Anamanaguchi, which is an American rock band.

8.3 Bee Movie script

English

According to all known laws of aviation, there is no way a bee should be able to fly. Its wings are too small to get its fat little body off the ground. The bee, of course, flies anyway because bees don't care what humans think is impossible.

Thiguka
